

Instructions for Updating Windows (All screen shots were captured from Internet Explorer on Windows XP)

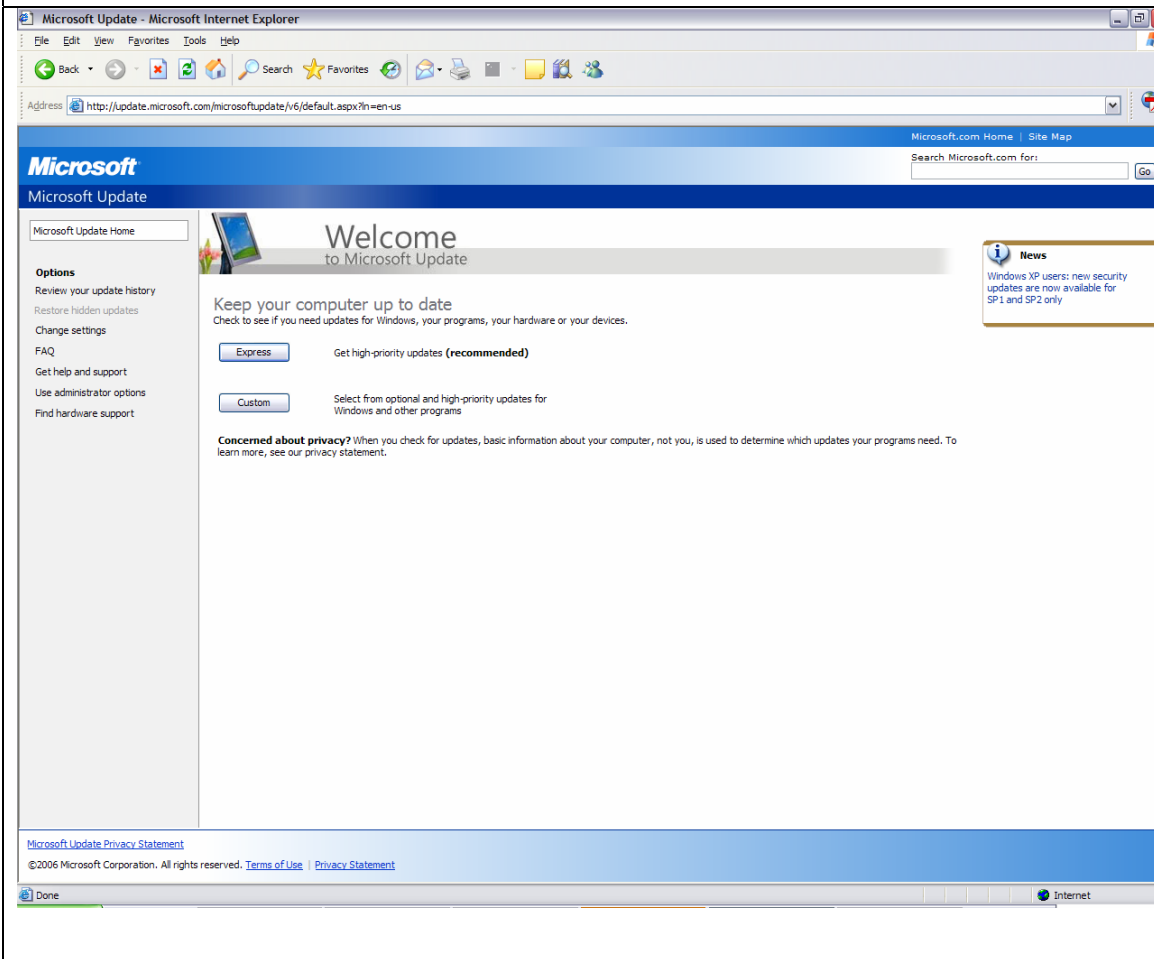

1. Launch Internet Explorer from your computer (either from the desktop or the start menu).

2. From the Tools menu, select Windows Update.

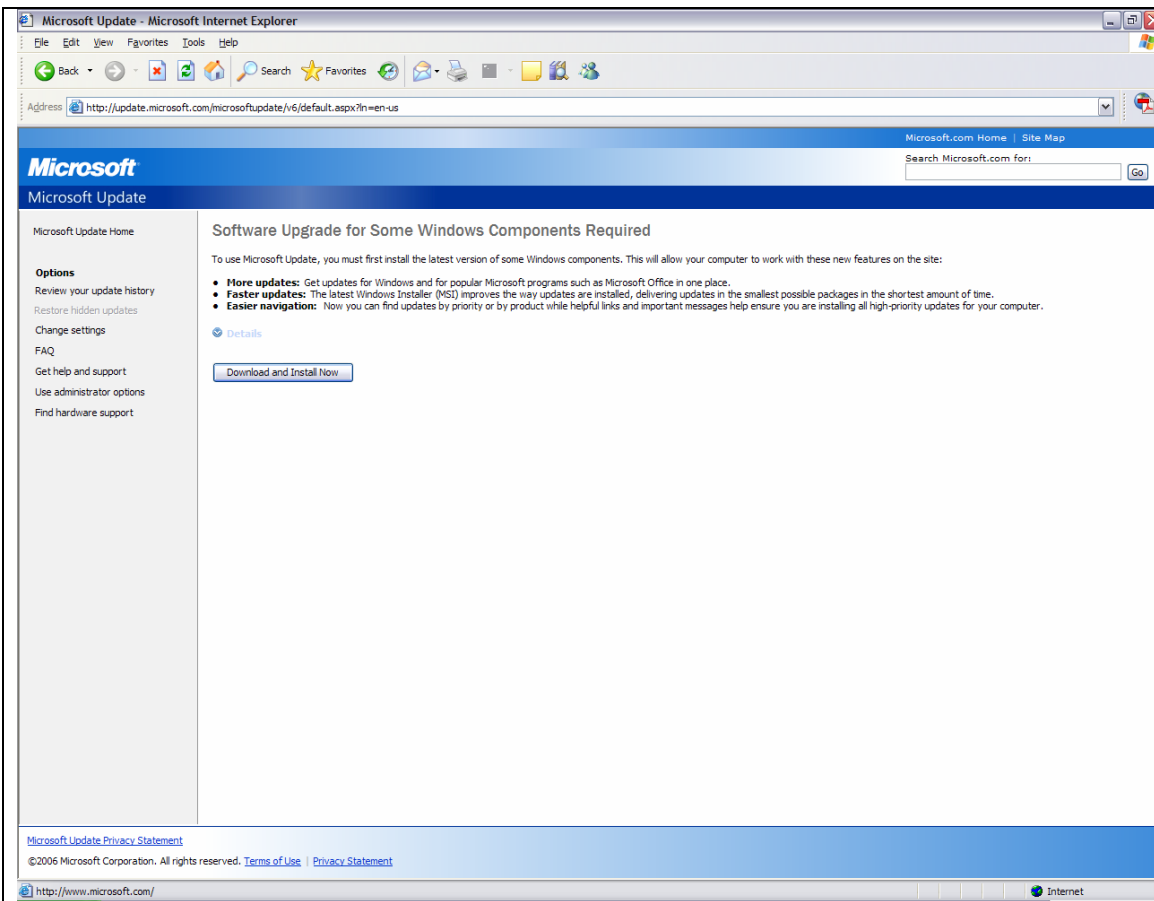

Opens the Windows Update Web page to update components.

3. After the Microsoft Update website loads and Checks to determine what updates need to be applied, you will notice a screen such as you see here.

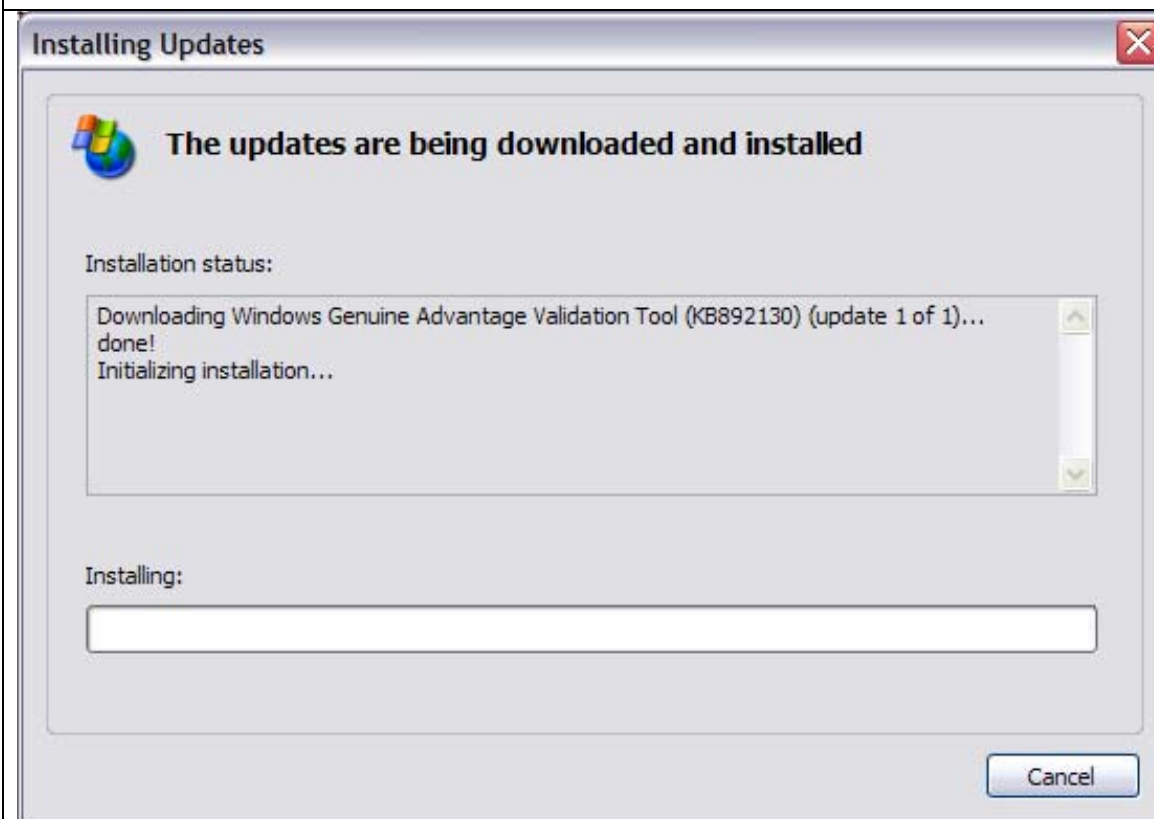

4. Click on the Express button (Get high-priority updates)

5. You may or may not encounter this screen – depending on whether or not your pc needs updating. If you do encounter this screen, click on the Download and Install Now button.

[Download and Install Now](#)

6. This is just a notify window. Do NOT click on the Cancel button. This screen will provide a status of the download/s and install/s – it may take a few minutes to complete.

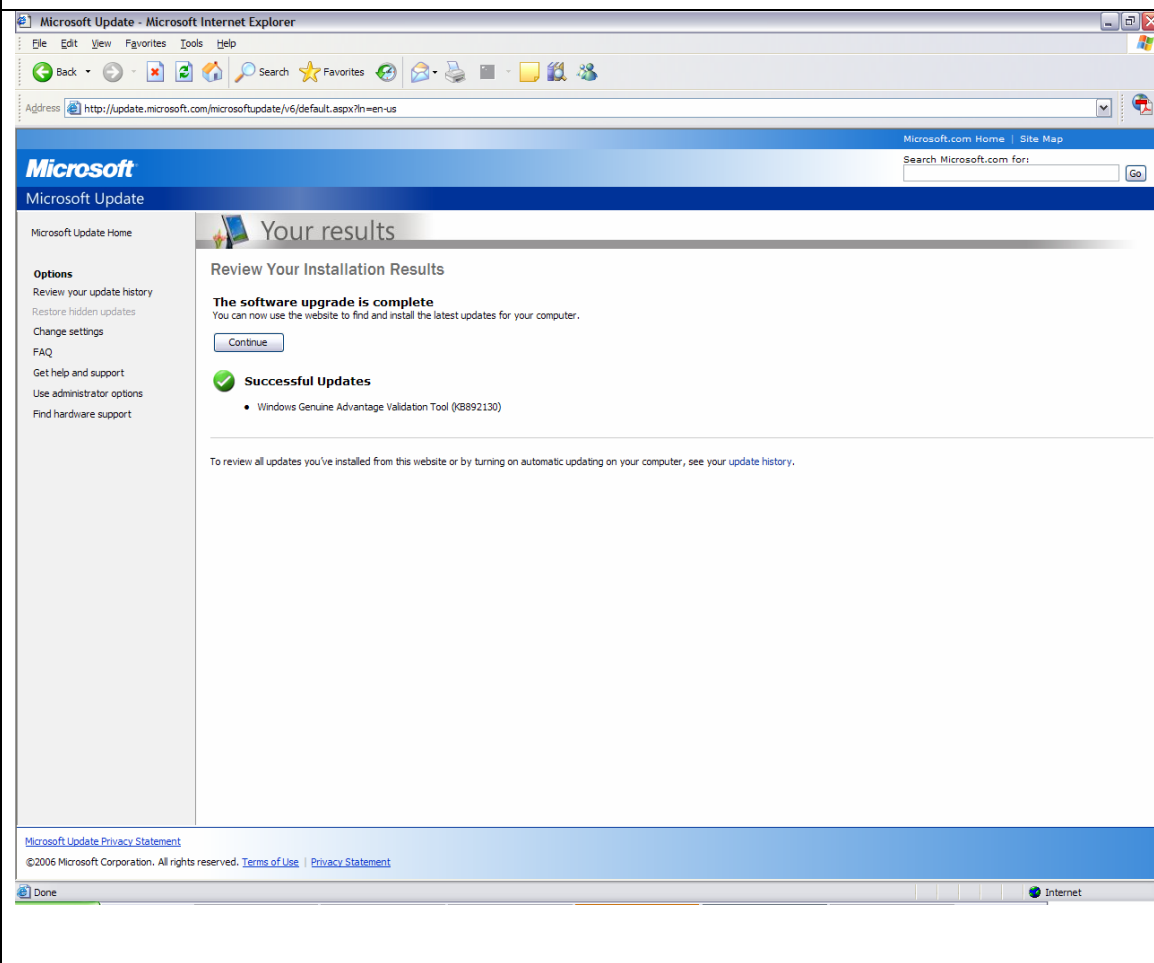

7. Once you've reached this window, it is ok to click the Close button.

Note:
You may be required to Restart your pc at this point.

8. Once you've reached this screen, click on the Continue button to install any additional updates.

9. After you reach this screen, click on the Install Updates button.

Note: When updates are required, this button will appear with the text bold-black, and you will notice the total number of updates.

Note: If prompted to "Accept" any license agreements, accept them all in order to continue with the updates.
