ACAD Final Project

Group Case Study Presentation

Learning Outcome

Student will become aware of their growth as a first year student.

Instructions

For this assignment you will be assigned specific case studies that you and your group will be required to “reinvent”. The group will act out and rewrite the case using the principles and concepts as presented throughout the course and textbook. You will turn in one written assignment for the group, as well as present the new case study to the class. All group members must participate in the presentation of the new case study.

Written Assignment

- List 5 mistakes that the characters made in the original case study and explain why the behavior or choice of that character led to an unsuccessful outcome.
- If the characters could have behaved differently, what would the new behavior/choice be for each of the 5 mistakes? Please apply at least 3 different course principles or concepts when explaining your answers.

Presentation

Act out the case study as given with the incorrect behaviors as well as the “new” modified case study with the corrected behaviors for the class. This enactment should include the various course principles and concepts that you identified in the written portion of the assignment. All group members are to participate in this presentation. You will have 5-10 minutes for your presentation. Please don’t be afraid to get creative.
