Organizations are increasingly utilizing project management practices to remain competitive in today’s competitive and turbulent global economy. Today’s organizations rely on project management practices to implement their strategic vision, drive investment decisions, and add business value. With the emerging reliance on project management practices, organizations are consistently searching for qualified employees with knowledge and proven skills in project management standards and innovative practices.

Whether you are a seasoned professional looking to enhance your knowledge of cutting edge project management practices, looking to earn PDUs to maintain your existing PMP certification, or a graduate student looking to enhance your project management knowledge and skills, the Project Management Graduate Certificate offered through the BIT Department at the Fogelman College of Business at the University of Memphis is the best fit for you!

The Graduate Certificate in Project Management is a four-course program that can be taken post-bachelor’s degree, post-master’s degree, or as part of a master’s degree program. This program is designed to provide prepare and develop the necessary skills for business professionals to succeed in project management teamwork and leadership. The program has a specific emphasis on managing project that integrate information systems, business strategy, and business processes.

Benefits

= Certified – Offered through the University of Memphis Fogelman College of Business and Economics, which is 100% AACSB accredited.

= Flexible – Classes are typically offered after 5:30 p.m. The certificate can be completed as quickly as in one year, as two of the courses are offered in the Fall and another two in the Spring semesters.

= Expandable – Classes taken to earn the Certificate can count towards a master’s degree in Information Services for degree-seeking students.

= Connected – Take advantage of the tremendous networking opportunities with other professionals in your career.

= Extended-Residency – Graduates of the MSIS degree program and the Project Management Certificate program may apply for extended months of OPT after completion of both programs during the same semester.

= High-Demand – There is a continuously increasing level of demand from the business community and advisory boards for individuals with specialized project management training.

= Continued-Learning – By enrolling in this Project Management Certificate program you can earn PDUs to maintain a PMP Certification.
