

Smith & Nephew's Reconstructive Orthopaedic Division, a dynamic leader in the design and manufacture of surgical Orthopaedic implant products, has immediate openings for Fall Research interns.

### **Research Intern**

This position has the responsibility of working on a Research team to help fulfill their objectives. Work assignments primarily include laboratory work (sample preparation, setting up and running tests, etc.), data analysis, literature searches, and report writing.

Eligible students include Juniors, Seniors and Graduate students majoring in Mechanical Engineering, Biomedical Engineering or related Engineering Science. Recent BS or MS graduates interested in internship opportunities are also welcome to apply. Co-op students are also encouraged to apply. Laboratory experience is preferred. Excellent people and team skills are required. Duration of internship is August to December 2008 (may be able to modify to adjust to student's schedule). Location of internship is Memphis, TN

If you desire the opportunity to work with industry to develop and apply your skills to engineering projects, apply online at:
