Office Hours:
Monday 2:30pm – 3:30pm; or by appointment.

Course Description:

COMP 4040-6040 – Programming Languages
Comparative features, syntax and applicability of high-level programming languages such as FORTRAN, PASCAL, LISP, Scheme, ADA, C, C++, JAVA, PHP, JavaScript, Perl, Prolog, FORTH; data types, data structures, dataflow; procedures, recursion, runtime environment, string manipulation, list processing, array processing, documentation, programming style.

Requirement:
Students must bring their own laptop to the class.

Learning Outcomes:
- Demonstrate an ability to apply knowledge of functional programming to software systems.
- Demonstrate understanding of least two modern programming languages.

Required Textbook:

*Concepts of Programming Languages, 11th Edition* by Robert W. Sebesta
https://amzn.com/013394302X

Optional Textbook:

*Programming Language Pragmatics, Fourth Edition* by Michael L. Scott (Morgan Kaufmann, 2009)
http://amzn.com/0123745144
http://store.elsevier.com/Programming-Language-Pragmatics/Michael-Scott/isbn-9780123745149/

http://amzn.com/1934356999
Evaluation:

Grading Scale: A: 85 – 100, B: 75 – 84, C: 65 – 74, D: 55 – 64, F: 54 and below. (Plus/minus grading will be used).

Grading:

1. Midterm – October 5th: 30%
2. Assignments: 20%
3. Project: 15%
4. Final Exam – December 7th, 5:30pm-7:30pm: 30%
5. Attendance: 5%

Course Policies:

Late Policy: Without prior request, no late work will be accepted. All late submission maybe accepted at a penalty of 15% per day for no more than THREE days.

Testing Policy: All the midterm exams given are closed book/note/laptop/neighbor. But students are allowed to bring one cheat sheet (one piece of letter-size paper) for quick reference. Midterm exams are not cumulative. There will NOT be any makeup exams unless there is a documented emergency.

Homework Assignment and Project Report Policy: It is recommended that students use a word processing software (e.g., Word or LaTeX) to type their homework solutions or project report, then submit well-formatted PDF files.

Plagiarism/Cheating Policy:
Plagiarism or cheating behavior in any form is unethical and detrimental to proper education and will not be tolerated. All work submitted by a student (projects, programming assignments, lab assignments, quizzes, tests, etc.) is expected to be a student's own work. The plagiarism is incurred when any part of anybody else's work is passed as your own (no proper credit is listed to the sources in your own work) so the reader is led to believe it is therefore your own effort. Students are allowed and encouraged to discuss with each other and look up resources in the literature (including the internet) on their assignments, but
appropriate references must be included for the materials consulted, and appropriate citations made when the material is taken verbatim.

If plagiarism or cheating occurs, the student will receive a failing grade on the assignment and (at the instructor’s discretion) a failing grade in the course. The course instructor may also decide to forward the incident to the Office of Student Conduct for further disciplinary action. For further information on U of M code of student conduct and academic discipline procedures, please refer to: http://www.memphis.edu/studentconduct/misconduct.htm

Your written work may be submitted to Turnitin.com, or a similar electronic detection method, for an evaluation of the originality of your ideas and proper use and attribution of sources. As part of this process, you may be required to submit electronic as well as hard copies of your written work, or be given other instructions to follow. By taking this course, you agree that all assignments may undergo this review process and that the assignment may be included as a source document in Turnitin.com's restricted access database solely for the purpose of detecting plagiarism in such documents. Any assignment not submitted according to the procedures given by the instructor may be penalized or may not be accepted at all.

Topics
- Week 1. Overview and Introduction
- Week 2. Evolution of the Major Programming Languages
- Week 3. Describing Syntax and Semantics
- Week 4. Lexical and Syntax Analysis
- Week 5. Names, Binding, and Scopes
- Week 6. Subprograms
- Week 7. Abstract Data Types and Encapsulation Constructs
- Week 8. Support for Object-Oriented Programming
- Week 9. Exception Handling and Event Handling
- Week 10. Functional Programming Languages
- Week 11. Logic Programming Languages
