

SMARTBEAR

Associate Java Developer

Interested in Software Development? Eager to learn the ins-and-outs of UI technology development? SmartBear is looking for an Associate JavaScript Developer that is eager to help with the UI evolution of our AlertSite product. Beyond UI enhancements, this role will expose you to the development of browser extensions and backend modules based in NodeJS.

Having an interest in Software Development and eagerness to learn is a must as you will work with other Developers, Product Managers, and UX closely. SmartBear's AlertSite product is used by 1,000s of companies worldwide (jetBlue, StubHub, Hilton to name a few) and provides a unified platform for proactive monitoring and alerting for API, mobile, transactional, and web app technologies.

Responsibilities:

- Design and implementation of enhanced UI screens and portals.
- Development of JavaScript extensions for Chrome, Firefox, and other platforms as needed.
- Evolution of existing modules using NodeJS.
- Collaborate with UX designer in the design of new UI screens.
- Help on the design and implementation of new AlertSite features.

Qualifications:

- 0-2 years of experience developing with JavaScript.
- Bachelor's degree in computer science, computer engineering, or other related technical fields.
- Experience with AngularJS, NodeJS, Java, Docker, and/or agile development preferred
- Exposure to web applications, API, and/or release management a plus
- Legally authorized to work in the United States (minimum of H1B).

SmartBear Is A Destination Employer
