Fall Semester Update

The course instances for Fall courses are now being created by Banner. These courses are listed under departments/categories. Students are also being enrolled in these courses (visible in the Classlist), but the students will not have access until the beginning of the semester when the courses are made "active" (currently 8/27/2007).

You may develop your course within these courses or request a separate [development course](#) (no students are enrolled) according to your needs. Prior to the semester start ([see new processes, including support information](#)), you will need to copy course components (i.e. content, discussion topics, quizzes) from your development course or other course into the Fall course instance.

Why do we teach?

I am a teacher at heart, and there are moments in the classroom when I can hardly hold the joy.

When my students and I discover uncharted territory to explore, when the pathway out of a thicket opens up before us, when our experience is illuminated by the lightening-life of the mind – then teaching is the finest work I know.

- Parker Palmer, The Courage to Teach
