ALUMNI PROFILE

William O. Hagerman

Senior Vice President, Dunavant Enterprises, Inc.

Herff College of Engineering Experience

"The College provided me with a diverse, well-rounded education, which helped me excel in my career. The outstanding faculty taught me more than a particular area of engineering – they taught me the fundamental principles involved in practicing engineering as well as leadership skills. This combination helped me successfully cross into various fields of engineering. Since graduating I have owned two consulting engineering companies, and I've found that the graduates I hired from the University of Memphis did as well or better than those I hired from big-name or Ivy League schools."

Dreamers. Thinkers. Doers.
