

ALUMNI PROFILE

Stephen P. Liberto FedEx Express Vice President Global Trade Services, U.S./International

Herff College of Engineering Experience

"I had the pleasure of attending the Herff College of Engineering while starting my engineering career at FedEx. The University of Memphis was very instrumental in advising me of the best curriculum to prepare me for the leadership challenges required in a business environment. I am glad to see how the College of Engineering continuously adapts to business' engineering requirements."

Professional History

Steve Liberto has global responsibility for customs brokerage and clearance, regulatory changes and trade affairs, and regulatory compliance across 64 clearance ports and 215 countries around the world. Prior to assuming Global Trade Services responsibility in 2001, he lived in Brussels, Belgium, and served as the Vice President of Planning, Engineering, and Operations Support for FedEx Europe, Middle East & Africa (EMEA) division. Liberto was also the Managing Director of Global Service Engineering in 1997 and of National Hub Operations (NHO) Planning and Administration in Indianapolis, Indiana, in 1989. Prior to his MD positions, he held various senior manager and manager positions in engineering planning support to various airport and ramp operations. Beginning in 1978, he held various engineering positions planning the growth of FedEx' largest Memphis Hub operation.
