

FLL Scrimmage!

EDAY will once again host a drop-in **First Lego® League** scrimmage using the 2017-2018 competition field and the new missions for the 2017-2018 theme “**HydroDynamics.**”

FLL teams will bring their current robot with programs, a programming laptop and their **Mindstorm®** supplies to practice/compete in scoring points from the missions. Referees will be scoring the missions to help assist the teams in understanding the scoring.

Activities will be round robin allowing each team to try out their robot & programs then go back to a workstation, and modify their robots & programs to improve their performance.

There is space for as many teams as want to compete! ALL FLL teams are encouraged to drop in and show what they have going for this season.

The scrimmage will be in room ET 204 from 9:00 AM until 4:00 PM – no registration required!
