### ETS® Proficiency Profile

#### Summary of Scaled Scores

To show the ability of the group taking the test

**University of Memphis**  
**Abbreviated**  
**Test Description:** Combined

- **Number of students tested:** 789
- **Number of students included in these statistics:** 774
- **Number of students excluded (see roster):** 15

**Skills Subscores:**

- **Critical Thinking**  
  - 100 to 130  
  - Mean: 110.74  
  - 25th to 75th Percentile: 106 to 115
- **Reading**  
  - 100 to 130  
  - Mean: 117.21  
  - 25th to 75th Percentile: 111 to 123
- **Writing**  
  - 100 to 130  
  - Mean: 114.10  
  - 25th to 75th Percentile: 110 to 119
- **Mathematics**  
  - 100 to 130  
  - Mean: 113.05  
  - 25th to 75th Percentile: 109 to 116

**Context-Based Subscores:**

- **Humanities**  
  - 100 to 130  
  - Mean: 113.85  
  - 25th to 75th Percentile: 113 to 119
- **Social Sciences**  
  - 100 to 130  
  - Mean: 112.75  
  - 25th to 75th Percentile: 112 to 118
- **Natural Sciences**  
  - 100 to 130  
  - Mean: 114.52  
  - 25th to 75th Percentile: 114 to 119

*The confidence limits are based on the assumption that the questions contributing to each scaled score are a sample from a much larger set of possible questions that could have been used to
measure those same skills. If the group of students taking the test is a sample from some larger population of students eligible to be tested, the confidence limits include both sampling of students and sampling of questions as factors that could cause the mean score to vary. The confidence limits indicate the precision of the mean score of the students actually tested, as an estimate of the "true population mean" - the mean score that would result if all the students in the population could somehow be tested with all possible questions. These confidence limits were computed by a procedure that has a 95 percent probability of producing upper and lower limits that will surround the true population mean. The population size used in the calculation of the confidence limits for the mean scores in this report is 774.

Reports based on a sample of fewer than 50 test takers are representative of the performance of that sample only. Reports based on fewer than 50 test takers should not be considered representative of the larger group of like students, and inferences or generalizations about the larger population or subgroup should not be made based on such small samples.
