**Body Art By:** Aws Samir

Tattoos are very popular in the United States. I never saw anyone with a tattoo before I came here. Very few people in my country have tattoos or piercing, getting a tattoo or piercing is a personal decision. Maybe they want to look like their favorite actor, musician, or athlete. Some people get piercing in their ears, eyebrows, nose, lips, tongue, and many other places. I think that some small earrings or studs look good, but large earrings look uncomfortable. Some people regret getting a tattoo or piercing and after a while they try to have it removed.

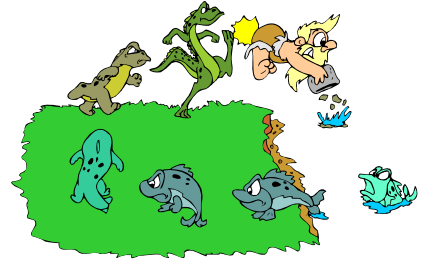

There are also many things outside the house that a woman can not do outside the house like cut the grass. So I think that men and women have to work together to avoid these problems, and then they will have a better life, house, and children.

## Housework

**By:** Aws Samir

Nowadays, housework has become a big problem between married couples that may result in divorce. Divorce can be avoided if they work together, helping each other inside or outside the house. There are many things that the man can not do inside the house like take care of the children.

Perhaps, do you think that this world appeared by itself? Do you believe that man has evolved from a monkey, or an ameba is an ancestor of a human? I was taught about the evolution theory at school. The evolution theory says that this world appeared by itself and by accident. However, the Bible says that God created the world. Nobody believes that a complete car is made by itself from tens of thousands of parts. Nevertheless, many people believe that man, who is more accurate than the car, is made accidentally. In fact, the creator that made man is there and as real as the person who designs the car is there. The Bible points out the falsehood of evolution in various ways.

First, God created all things according to their various kinds. According to the law of heredity, human beings carry on a family line in human beings, monkeys carry on monkeys, reptilian creatures carry on reptilian creatures, birds carry on birds, beans carry on beans, red-beans carry on red-beans, and roses carry on roses. Features of various living things are decided by their DNA. It is an amazing fact that a great number of people differ in features from each other because of different combinations of genes that each person receives from their ancestors. Life comes into being from only life.

Second, evolutionists can't explain anything about your spirit and soul, only the physical bodies. However, there are spirit, soul, and body in a human being. The Bible reveals that God formed man from the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being. The evidence which is clearly seen on all things proves that apocalypse of God is true.

Third, evolutionists can't explain the process how male and female come into being. The Bible reveals that God created male and female. They will just explain that this generated by itself, too.

Finally, evolutionists can't explain a bit about the generation of language. The Bible says that at first, the whole world had one language and a common speech, but in event of the Tower of Babel, God confused human language and scattered people over all the earth. Even the most primitive and imbecile people use their language, form their unique culture, invent new tools, and have a spiritual life. In contrast, the most intelligent and trained chimpanzee can't do anything like this.

The bad effect of evolution came into the human mind and messed up human history. Communism that seduced the freedom of a number of people and drove them into poverty was created by it and it gave over that Hitler did massacre the innocent Jews. Furthermore, it made the mind blind so that humans cannot know God. Hitler's world-view was based on Darwinism. If Karl Marx or Adolf Hitler didn't agree with the evolution theory, there is a thread of connection between the evolution theory and their world-view.

Generally, the weak become the victims of the strong by the law of the jungle. Evolution incites a weak-to-the-wall kind of society. However, God says to us to take care of the weak. If we disregard the weak, we ought to look back where we are in the matrix of evolution.

## My Country's Designer

By: Han Jun

I am going to introduce a designer from my country. His name is Youn Soo Park. He is a famous designer and I think he is famous around the world. He is very energetic and powerful. I heard the music at his fashion show. I saw him at the fashion show. The show was colorful and wonderful. I like him and respect his work. He makes beautiful and practical clothing. His career has been splendid. He participated in the prêt-a-porter fashion show in Paris and designed clothing for the New York collection, and "The Osaka world collection" in Japan, etc. Now, he is a famous designer in Korea, but he'll be famous all over the world, I hope. I like to him because he is a leader in Korean fashion according to critics.

## Succeeding in Change

By: Woo Chang

A business man is smoking at the top of a building. His face is full of complaints as though he is abused by the president in his company. While smoking, he thinks he should quit smoking. He feels as if he is the cigarette's slave. He is disgusted with himself for continuing to smoke even if his health condition is getting worse and worse. Suddenly, he decides to quit smoking and throws the pack of cigarette he has just opened to another building. As though he wanted to make sure his decision is unshakeable, he shouts at the sky, "I'm never going to smoke again!" After work, he goes to a bar to meet his friends, and drinks a lot. A short time later, his friends notice that he has not smoked at all since he came to the bar. They realize that he is trying to stop smoking. One of his friends offers him a cigarette with an evil smile. He hesitates about what to do at first, but soon he receives the cigarette passively. Most of smokers who have ever tried to quit smoking may have experienced this kind of situation. As was shown above, you realize that he made the decision on impulse. There is no plan to keep his decision. This kind of a-spur-of-the-moment decision usually does not last long. It applies to other situations, too. Teenagers especially make decisions on impulse. Have you ever tried to change yourself? Did you make it? I know it is hard to make changes, especially old habits. However, if you tried to change yourself step by step, then you can make it. I would like to introduce some tips to help you.

- Self-questions -

First, do you know clearly why you should change yourself?

Second, do you have an obvious vision that you will achieve through the change?

Third, do you have a device to overcome obstacles which hinders the change?

Fourth, do you enthusiastically participate in your plan?

Fifth, do you have a strategy to practice your plan constantly?

Ask these questions to yourself, and make a plan carefully. It also could be a good way to imagine your future portrait. Take a deep breath, and think about your 3-years-later future. How do you think your status is going to be 3 years later if you keep doing what you have been doing? But, do not forget that preparations only take you so far. After building a plan, you have to move your plan on to practice. No pain, No gain!
