Civil Engineer

MidSouth Utility Consultants, LLC provides a dynamic work environment with the opportunity and responsibility to impact hundreds of thousands of people every day through comprehensive planning, design, testing, and construction contract administration services to rural electric cooperatives, municipal electric power systems, and large industries who have their own high voltage facilities.

Candidates must be completing/have completed a 4 year civil engineering program by May 2015 with the understanding that rewards are the result of purposeful, hard work.

Duties will include:
- Construction inspection and Project Management
- Site grading and drainage plans
- Reinforced concrete foundation design
- Power line design surveying and staking
- Review of structural steel calculations
- Environmental Planning
- Electrical Substation Layout, Design and Specifications

Preferred Skills:
- AutoCAD, Microstation, ARCGIS, PLSCADD
- MS Excel & MS Project
- Knowledge of construction methods and procedures

Candidates should email responses with resumes to info@msuc.net

Applicants only. Recruiters, please don’t contact this job poster.
Do NOT contact MidSouth Utility Consultants with unsolicited services or offers.
