NCAE-Research on Cyber Resilient 5G-Enabled Electric Vehicle Charging Infrastructure

Grant Name *

NCAE-Research on Cyber Resilient 5G-Enabled Electric Vehicle Charging Infrastructure

Grant Number

H98230-22-1-0326
The projects overall goal is to explore related technologies to develop a secure and trustworthy approach for 5G-enabled electric vehicle charging station (EVCS) and its charging system. This project will significantly impact industry, academia, and society at large. In military bases, the proposed 5G-based EVCS can play a significant role in charging vehicles securely and successfully. The PIs will also engage in outreach and educational activities designed to expose diverse populations, including women,
Zero-Trust Identity & Access Management

Grant Name *
Zero-Trust Identity & Access Management

Grant Number
2022-4

Grant Period of Performance
9.1.2022 - 8.31.2025

Grant Funding Amount
$450,000

The goal of this project is to increase the understanding of Zero Trust methodology, principles and implementation and also to prepare organizations to face existing threats and adapt to new threats in the future. CfIA will develop a new 5-hour web-based course titled, Zero Trust: Identity & Access Management, to serve approximately 400 individuals and help state, local, tribal, and territorial governments and private industry administrative and IT personnel implement organizational policies, procedures...

Developing Application-Specific Shared Trust Framework for Accessing Sensitive Information

Grant Name *
Developing Application-Specific Shared Trust Framework for Accessing Sensitive Information

Grant Number
H98230-21-1-0327

Grant Period of Performance
8.1.2021 - 7.31.2023
Grant Funding Amount

$251,000

Grant Description

Center for Information Assurance director Professor Dipankar Dasgupta received a $251K grant from the National Centers of Academic Excellence in Cybersecurity for Developing application-specific shared-trust framework for accessing sensitive information.

Multidisciplinary Cybersecurity Program for Critical Infrastructure Protection

Grant Name *

Multidisciplinary Cybersecurity Program for Critical Infrastructure Protection

Grant Number

H98230-21-1-0319

Grant Period of Performance

8.20.2021 - 12.31.2023

Grant Funding Amount

$2,000,000

Grant Description

The overall project goal is to design and develop a multi-disciplinary critical infrastructure cybersecurity program addressing the technical needs of public utility operations and emergency decision-makers. A successful outcome of this project will create a strong southeast regional coalition, leveraging the NCAEs expertise in cybersecurity to assist NCAE-C students (the future workforce), state and local government and critical infrastructure industry partners in contending with evolving threats.

Cybersecurity Impact for End Users Security and Privacy
Cybersecurity Impact for End Users Security and Privacy

Grant Number
2021-3

Grant Period of Performance
9.1.2021 - 8.31.2024

Grant Funding Amount
$600,000

Grant Description
The Center for Information Assurance received a $600K grant from DHS/FEMA to develop cybersecurity training courses on Remote Home Office (RHO) security and End Users Security and Privacy (ESP). The UofM portion of the DHS/FEMA grant is led by Professor James McGinnis (Engineering Technology), and the grant is part of a multi-

Scholarship for Services (SFS)

Grant Name *
Scholarship for Services (SFS)

Grant Number
2146427

Grant Period of Performance
2.1.2022 - 1.31.2027

Grant Funding Amount
$3,800,000
A $3.8 million Cybersecurity Education Grant from National Science Foundation (NSF). The five-year project, titled CyberCorps Scholarship for Service: Developing the Cybersecurity Workforce in West Tennessee, Mississippi, and Arkansas will recruit four cohorts of scholars from the Department of Computer Science, Department of Business Information Technology, College of Engineering, Department of Criminal Justice and other UofM units. Priority will be given to underrepresented students such as women, minorities, and veterans. The grant is given under the NSF's Cybercorps Scholarship for Service program.

**GenCyber Summer Boot Camp for High School Students**

**Grant Name**
GenCyber Summer Boot Camp for High School Students

**Grant Number**
H98230-22-I-0109

**Grant Period of Performance**
3.01.2022 - 2.28.2023

**Grant Funding Amount**
$100,000

**Grant Description**
The Department has received a new one-year, $100K cybersecurity education grant from the National Security Agency. Part of the NSAs GenCyber program, the project will create an integrated curriculum, in consultation with a K12 pedagogical expert, focused on incorporating fundamental cybersecurity concepts with their applications to...
Designing Machine Learning-based Solutions for APT Detection

Grant Number

MSA 12-1048-013

Grant Period of Performance

8.01.2022 - 7.31.2025

Grant Funding Amount

$397,000

Grant Description

UoMs Dr. Kan Yang (PI) and Dr. Xiaofei Zhang (Co-PI), two assistant professors in the Department of Computer Sciences, have been awarded funding from FedEx Service Inc. to develop advanced machine learning-based solutions to enhance the enterprise cyber analytic defense ecosystem. The project, entitled Designing Machine Learning-based Solutions for APT Detection, will explore the recent advancement of machine

Outreach / Professional Development

1. Professional Development

Provide separate examples of professional development opportunities provided to faculty and students since your last annual report / application.

Evidence files can be fliers, posters, letters, attendance records, or other evidence of professional development for faculty and students (in PDF).

PDF

Choose Files

No Files Selected
2. Outreach Activities

2a. Provide evidence of how the institution has shared cyber related curriculum and/or faculty with other schools, to include K-12 schools, community colleges, technical schools, minority colleges/universities to advance cyber defense knowledge since your last annual report / application. Identify specific materials provided, to whom the material was provided, when and for what purpose. Any additional supporting documentation of this exchange, such as emails, formal meeting notes, links to material on accepting parties website, etc. is encouraged (in PDF).

Provide evidence of how the institution has shared cyber related curriculum and/or faculty with other schools, to include K-12 schools, community colleges, technical schools, minority colleges/universities to advance cyber defense knowledge since your last annual report / application. Identify specific materials provided, to whom the material was provided, when and for what purpose. Any additional supporting documentation of this exchange, such as emails, formal meeting notes, links to material on accepting parties website, etc. is encouraged (in PDF).

2b. Provide evidence since your last annual report / application that the institution has participated in CAE events such as: CAE Community Symposium, CRRC workshops for applying institutions, CAE Tech Talk/Forum used in classroom, collaboration on grants with CAE institutions (in PDFs).

Institution Reflective of the CAE Designation

: Parent Section : Institution Reflective of the CAE Designation

Institution Successes & Achievements

Since the institutions last designation application - Describe activities that represent successes and achievements of the program(s) reflective of the CAE designation / POS Validation such as scholarships, outreach, partnerships, awards, conference participation, etc.
Dr. Kan Yang, University of Memphis CfIA Associate Director, received NSF’s CyberCorps Scholarship for Service grant. During the Fall 2022 semester, three students entered the program: 1 undergraduate, 1 accelerated bachelors & masters, 1 doctor of philosophy. During the Spring 2023 semester, four additional undergraduate students entered the program.

**Designation Return on Investment**

Identify any opportunities, successes and/or achievements, grants specifically resulting from the institutions designation as a CAE.

Dr. Hasan Ali and Dr. Dipankar Dasgupta received NSA grant on "NCAE-Research on Cyber Resilient 5G-Enabled Electric Vehicle Charging Infrastructure." Additionally, Dr. Dipankar Dasgupta was an University of South Carolina subaward recipient for the "Context-Aware Authorization Framework for Smart Critical Infrastructure NCAE-C Cybersecurity Education Research."

**CAE Community Contributions**

Check all that apply to the institutions specific contributions to the CAE Community

- [ ] Attendance at CAE Community Meetings
- [ ] CAE Research Collaborations (state collaboration information)
- [ ] CAE Mentor / Reviewer
- [ ] Participation in CAE Working Groups (name working group)
- [ ] CAE Research Collaborations (state collaboration information)
- [ ] CAE Forum / Tech Talk contributor (date presented / topic)
- [ ] CAE Regional Hub (CRH) or CAE National Resource Center (CNRC)
- [ ] Participation in KU development and refinement
- [ ] Other (provide contribution information)

**Additional Information**

Institution may use this section to provide any additional information not previously mentioned in this report pertinent to the CAE program.

It should be noted that the "Organization Details - President of Institution" was updated, but has of yet to be migrated to the "I. Institution: 2. President of Institution" tabs of the Annual Reports. The issue has been brought to the attention of the CAE Application Portal developers. Additionally, please note the following: (1) The UoM’s cybersecurity club is called the Cyber Tigers. It’s president’s name is Spencer Tartera. (2) Tony Pinson, UoM CfIA Project Coordinator, attended CAE Program Development Advisor Workshop on January 27, 2023. (3) Tony Pinson, UoM CfIA Project Coordinator, is serving as a CAE Mentor for Temple University’s Cyber Program. (4) Tony Pinson, UoM CfIA Project Coordinator, attended the FDA: Automobile Security - Car Penetration Testing/Mall of America event on August 10, 2022.
