COMP 4118/6118: Introduction to Data Mining

Instructor: Dr. Xiaolei Huang

Spring, 2024

Course Description

Data mining has emerged as a major frontier field of study in recent years. Aimed at extracting useful and interesting patterns and knowledge from large data repositories such as databases and the Web, the field of data mining integrates techniques from database, statistics and artificial intelligence. This course will provide a broad overview of the field, preparing the students with the ability to conduct research in the field. The following topics will be covered:

- Association
- Clustering
- Classification
- Data Warehouse
- Data Mining over Data Streams
- Web Databases

Textbook

There is no required textbook for this course. Many course materials refer to the following book:

*Data Mining: Concepts and Techniques. Jiawei Han, Micheline Kamber and Jian Pei: Morgan Kaufmann Publishers (3rd edition)*

Prerequisites

*Prerequisites: Algorithms & Data structures*
Lecture Schedule

* This is tentative.

Assessments & Grading

For COMP4118 enrollment:

- 7 assignments: weight 49%
- Participation: weight 16%
- Midterm: weight 15%
- Final: weight 20%

For COMP6118 enrollment:

- 7 assignments: weight 49%
- Participation: weight 16%
- Midterm: weight 15%
- Final: weight 20%

Note: Assignments and exams may have different questions for COMP4118 and COMP6118 students. We have three additional bonus assignments (5% each), which are optional.
Grading Scale

We will calculate final letter grades in two different ways; then each student will receive the higher of the two letter grades. One way is a fixed grading scale, with the following cutoffs:

- A+ [100, 97%]
- A [93 - 97)
- A- [90 - 93)
- B+ [87 - 90)
- B [83 - 87)
- B- [80 - 83)
- C+ [77 - 80)
- C [73 - 77)
- C- [70 - 73)
- D [60 - 70)
- F < 60

There is a curve: 15%

Course Policies

Plagiarism or cheating behavior in any form is unethical and detrimental to proper education and will not be tolerated. All work submitted by a student (projects, programming assignments, lab assignments, quizzes, tests, etc.) is expected to be a student’s own work. The plagiarism is incurred when any part of anybody else’s work is passed as your own (no proper credit is listed to the sources in your own work) so the reader is led to believe it is therefore your own effort. Students are allowed and encouraged to discuss with each other and look up resources in the literature, but appropriate references must be included for the materials consulted, and appropriate citations made when the material is taken verbatim.

If plagiarism or cheating occurs, the student will receive a failing grade on the assignment and (at the instructor’s discretion) a failing grade in the course. The course instructor may also decide to forward the incident to the Office of Student Conduct for further disciplinary action. For further information on U of M code of student conduct and academic discipline procedures, please refer to: http://www.memphis.edu/studentconduct/misconduct.htm
