

Junior Systems Administrator

Join our team of self-motivated and creative individuals looking to learn new technologies while gaining experience working on a variety of platforms. In this position you will get experience managing virtual instances, orchestrating architectural changes, assisting users, and learning new technologies.

Core Responsibilities

- Work on our production and test system infrastructure. Some work will be performed at our client's location near the Memphis International Airport. Other work will occur at our office in Germantown, TN. Onsite work is required for daily operations, but telecommuting is available for the resolution of support issues.
- Coordinate the development, implementation, installation, and operation of systems for the organization
- Desktop Support for front line internal users of a small group
- On-Call support of production server, desktop, and applications issues
- Consult with management and staff on upcoming projects and potential infrastructure impact

Qualifications and Experience

- People skills and clear communication is a must. You will be the face of our company on a daily basis.
- A true passion to be self-taught and explore new technologies on your own.
- Basic Linux experience is required.
- Windows experience is required.
- Scripting or some previous programming experience is preferred but not required
- High school diploma or equivalent
- All applicants must be currently authorized to work in the United States and pass a criminal background check.
- At this point H1-B Visa Sponsorship is not available for this position.
