Paid Internship Opportunity in Python ($15/hr)

We are a small tech consulting firm offering a limited number of internships for applicants with the following qualifications:

- Mid-level Python experience
- Familiar with web technologies such as HTML, JavaScript, CSS, etc.
- Proficient in writing math-heavy algorithms
- Excellent communication skills

Those selected will contribute to the development of a stat software. The student is expected to work remotely 20 hours per week for four months. In-person meetings might be needed for couple times. This is a wonderful opportunity for the students to improve their Python programming and problem-solving skills.

To apply, please send an email with your CV/Resume and a cover letter to Fatih Şen (fatihsen23@gmail.com).
