

BUSINESS ECONOMICS

WHAT YOU CAN DO WITH IT

- Economics is a structured way of thinking that builds models to explain why people behave the way they do. The focus of economics is extremely varied, ranging from issues that affect the whole economy to issues such as human welfare and equality.
- Economics prepares students for positions requiring a broad, general knowledge of the business environment, making economics majors more likely to occupy upper-level management positions.
- Economics majors are trained to recognize human behavior in relation to work, production, distribution and consumption, the fundamental operations of most business.
- Economics teaches skills and problem-solving techniques that employers value.
- Training in economics is the best preparation for further study, especially in law, economics, public administration, journalism, foreign affairs, and labor relations.

CAREER OPPORTUNITIES

Economics majors work in all facets of the business world, including manufacturing, banking, insurance, and retailing. There is a growing need for people with economics training in sports, recreation, entertainment and technology. The training received at The University of Memphis provides a logical systematic approach to a wide variety of problems and issues, including: product pricing; environmental and regulatory impact analysis; market development trends; and cost control analysis.

SCHOLARSHIPS AND INTERNSHIPS

Many scholarship opportunities are available for qualified business students majoring in economics. Opus 1 scholarship is specifically for an economics major who has submitted or planning to submit an article to Opus 1. Internships are available with a variety of businesses or with local or state governments and agencies.
