

Source

Title 40 CFR § 261.33 Discarded commercial chemical products, off-specification species, container residues, and spill residues thereof.

Description

The F-list contains wastes that result from manufacturing and industrial processes used in a number of different industries; hence, these wastes are known as wastes from **non-specific sources**. Examples include the array of solvents used for degreasing or cleaning.

Amended

Section 261.33 is amended by removing the entries for the U202 hazardous waste in the table ([source](#)). This amendment was published on December 17, 2010, with an effective date of January 18, 2011.

The primary hazardous properties of these materials have been indicated by the letters T (Toxicity), R (Reactivity), I (Ignitability), C (Corrosivity), and H (Acute Hazard).

Wastes are first listed in alphabetical order by substance and then listed again in numerical order by Waste Code.

EPA Waste Code	Chemical abstracts No.	Substance	Hazard Code
U394	30558-43-1	A2213	(T)
U001	75-07-0	Acetaldehyde	(I)
