

## ENGL 3603: Engineering Communications

ENGL 3603 teaches the fundamentals of technical communication, focusing on the needs of practicing engineers. The course is designed to equip you with the analytical tools you will need when facing a variety of writing situations in your professional life, transferable across documents, organizations, and settings. You will learn basic principles of rhetorical analysis for both oral and written technical communication, plus an understanding of readers and audience that inform document design. Finally, you will have the opportunity to learn about and apply collaborative writing and project management knowledge and skills. Additionally, the course will expose you to a variety of common business, organizational, and career genres and familiarize you with the general demands of each.
