

A word cloud visualization of research-related terms. The most prominent words are 'qualitative', 'quantitative', 'research', 'statistics', 'methodology', 'survey', 'data', 'analysis', 'correlation', 't-test', 'methods', 'triangulation', 'action-research', 'qualitative-vs-quantitative', 'challenging', 'blog', 'reading', 'reflection', 'production', 'evaluation', 'learning', 'participation', 'deliberative', 'collaborative', 'participatory'. Other words include 'spss', 'hard-work', 'standard-deviation', 'feedback', 'correlation', 'data', 't-test', 'methods', 'triangulation', 'action-research', 'qualitative-vs-quantitative', 'challenging', 'blog', 'reading', 'reflection', 'production', 'evaluation', 'learning', 'participation', 'deliberative', 'collaborative', 'participatory'.

The goal of this course is to prepare you to be able to formulate

The course will be conducted partially as a seminar and partially as a workshop as we will work together to design applied linguistics studies. You will design and get feedback on a proposed study that can be a precursor to your dissertation research or another project of interest. By the end of the semester, you will have a greater understanding of all of the different ways to approach the questions you are interested in researching and with the tools needed for you to design and carry out high quality research in applied linguistics.
