

ENGL 4602

Dr. Emily Gillo

Online

Advanced Composition: Chronically Online

This course explores how writing shapes (and is shaped by) online culture. In this class, we'll **analyze viral trends**, deep dive into various online communities, take a critical look at **misinformation, "AI slop," and digital content ethics**, and practice cultural explainers about various internet goings-on. Through rhetorical analysis, expository writing, and researched based argumentative writing, we will develop clear and persuasive prose for a variety of contemporary audiences. The semester will end with a **DIY digital zine project** that remixes your writing in this class into an accessible multimodal publication that **expresses both your authentic rhetorical voice and personal design aesthetic.**
