POWER UP YOUR CAREER

EARN A GRADUATE CERTIFICATE IN BUSINESS PROJECT MANAGEMENT

With the emerging reliance on project management practices, organizations are consistently searching for qualified employees with knowledge and proven skills in project management standards and innovative practices.

The **Graduate Certificate in Business Project Management** offered through the MIS Department at the Fogelman College of Business & Economics is a four-course program that can be taken post-bachelor's degree, post-master's degree or as part of a master's degree program.

This program is designed to provide, prepare and develop the necessary skills for business professionals to succeed in project management teamwork and leadership. The program has a specific emphasis on managing projects that integrate information systems, business strategy, and business processes.

Benefits

- **Certified** – Offered through the University of Memphis Fogelman College of Business & Economics, which is 100% AACSB accredited.
- **Flexible** – Classes are available in both traditional classroom and fully online formats. The certificate can be completed quickly with available sections in summer, fall and spring semesters.
- **Expandable** – Classes taken to earn the Certificate can count toward a master's degree in Information Services for degree-seeking students.
- **Connected** – Take advantage of the tremendous networking opportunities with other professionals in your career.
- **Extended-Residency** – Graduates of the MSIS degree program and the Project Management Certificate program may apply for extended months of OPT after completion of both programs during the same semester.
- **High-Demand** – There is a continuously increasing level of demand from the business community and advisory boards for individuals with specialized project management training.
- **Continued-Learning** – By enrolling in this Project Management Certificate program you can earn PDUs to maintain a PMP Certification.
