

BUSINESS ECONOMICS MAJOR

Financial Economics concentration

WHAT YOU CAN DO WITH IT

- Financial Economics is for students who are interested in the interface between finance and economics. It applies economic theory and empirical tools to study the financial markets.
- Financial economics prepares students for positions requiring a broad, general knowledge of the business environment and economic theory, as well as specialized knowledge in finance.
- Financial economics is also great preparation for law school and graduate study in public policy, journalism, and foreign affairs, as well as graduate study in economics and finance.
- Like economics in general, financial economics teaches skills and problem-solving techniques that employers value.

CAREER OPPORTUNITIES

- Financial economics addresses fundamental issues such as asset pricing, saving behavior, banking, corporate structure, financial regulation, and the interaction of the financial markets with the rest of the economy. This training is both broad and deep and allows majors to find careers in corporate finance, financial analysis, insurance, real estate, investment banking, and banking, as well as in government regulatory agencies.

SCHOLARSHIPS AND INTERNSHIPS

Many scholarship opportunities are available for qualified business students majoring in economics. Opus 1 scholarship is specifically for an economics major who has submitted or planning to submit an article to Opus 1. Internships are available with a variety of businesses or with local or state governments and agencies.

ECONOMICS SOCIETY

Omicron Delta Epsilon, ODE, a National Economics Honorary Fraternity is open to students that have taken 12 hours of Economics courses and have a 3.0+ GPA.
