

BUSINESS INFORMATION AND TECHNOLOGY (formerly MIS)

WHAT YOU CAN DO WITH IT

- Business Information and Technology (BIT) is the application of information technologies, including computers and communications networks, to business, with emphasis on management of the entire information systems function.
- The ideal person for such vast opportunities is the one with both a technical information systems and a business background. This combination of backgrounds is provided by the BBA in BIT degree.
- The content areas include systems analysis and design, database management, telecommunications and networks, client-side and server-side computer programming, and the management of information systems.

CAREER OPPORTUNITIES

- The U.S. Department of Labor consistently lists systems analysis and programming as among the top ten fastest-growing fields.
- Job categories include systems analysis and design, programming, database administration, network administration, web site design and development, and consulting.
- Virtually every type of business is dependent on information systems, so career opportunities are expected to increase in the future.
- BIT personnel are increasingly being called upon to help reengineer how businesses work to take full advantage of information systems capabilities.

SCHOLARSHIPS AND INTERNSHIPS

BIT students are highly sought after by Memphis-area businesses for paid internships which also carry course credit toward the degree. A variety of scholarships are available to qualified students majoring in BIT.

AMIS STUDENT ORGANIZATION

The area maintains an active student chapter of the Association for Management Information Systems. Contact Dr. Maraget Schultz, mschultz@memphis.edu or Dr. Brian Janz, bdjanz@memphis.edu, for membership information.
