## **Not able to locate MMR or Varicella documentation?**

**Your options are:**

### Have the test for immunity.

- If one component of the MMR Titer test is not positive, another immunization is required.
- If the Varicella Zoster test is not positive, BOTH immunizations must be taken again

### Have both immunizations again.

- Because the immunizations must be given 30 days apart, after the student has their first immunization (or set of immunizations), a temporary 30-day waiver will be applied to the student's account so they may attend classes when the semester begins.

**Note:** If an exempted student contracts Measles, Mumps, Rubella, or Varicella, or if a Measles, Mumps, Rubella, or Varicella outbreak occurs, it will be the student's responsibility to remain off campus until a physician gives written permission for the student to return to campus.
