

The Herff College of Engineering is located at the corner of Central and Zach Curlin. The parking garage is located off of Innovation Dr at the blue arrow on the map. The directions and map below will help guide you from the Guest Parking Garage to the Herff College of Engineering.

1. Pull into the parking garage and take a ticket from the machine for it to open the gate. We will give you a guest pass when you get here that will pay for the ticket when you leave. You may park anywhere in the garage.
2. Take the single elevator located on the back side of the garage down (South East Corner) to the first floor and walk out onto Norriswood Ave and follow it down to the engineering buildings using the green arrows.
3. The first building you will walk up on is the Engineering Technology building. Walk past this building until you come up to the next building named Engineering Administration, as seen on the map below.
4. Walk inside the double doors on the 1st floor and follow the signs leading you to the stairs or elevator and take them up to the 3rd floor.
5. Turn to your left when you exit the elevator and walk forward until you reach the desk. Take a right. On your left, there will be a set of offices. My office is to the far left, and I will meet you there.
