

# Who did Knowledge Quest's Early Childhood Academy Program serve in 2024-2025?

Prepared for: Knowledge Quest

The Early Childhood Academy (ECA) served **49 students** in 2024-2025

Participants came from **17 different zip codes** in Shelby County.

**53% boys**  
**47% girls**

**96%**

of children enrolled in the ECA program completed the academic year.

**57%**

of participants come from households earning less than **\$32,004** annually.

**30%**

family participation across six engagement events.

Findings show that ECA has a high completion rate. Children participating in ECA are more prepared for kindergarten, have improved social emotional development, and develop more advanced language, reading, writing, and math skills. Data also suggest that family engagement could be strengthened. Steps might include adjusting event times, tailoring activities to parents' interests, and incentivising family members participation in events.
