

MEMPHIS-WIDE URBAN BIOBLITZ

FRIDAY, APRIL 21, 2017 • 9:00AM - 1:00PM

A BioBlitz is an event that allows participating community members to do real scientific investigations into their local, biological habitats. Everyone gets to be a scientist for the duration of the event!

We would like to partner with your school/classroom to show the students what it can feel like to do real science in the field. We will have nets, collecting vials, iPads, microscopes - all organized to enhance the scientific experience for the students.

LOCATION:

- Meeman Shelby Biological Station

FOR QUESTIONS, CONTACT:

Dr. Cheryl Goudie
