PHIL 3411-M50

THE UNIVERSITY OF MEMPHIS

Contemporary Moral Problems

This course serves as an introduction to contemporary moral problems. We will begin with a survey of logical arguments and moral theories. Philosophical readings and case studies will prepare students to engage with challenging and controversial topics that are central to today's most pressing ethical problems, such as the existential threats and utopian promises of AI, hate speech regulation, misinformation challenges, climate change, and pandemics.
