

PHILOSOPHY OF MIND

What is the mind, and where does it end?

Explore some of the biggest questions in philosophy of mind and cognition. From traditional theories of cognition and intelligence to the enactive, and extended approaches—challenge conventional ideas about thinking and examine how mind, body, and world interact. Along the way, we'll investigate the self, and the philosophical implications of today's AI.

the biggest contemporary and embodied traditional theories and early artificial revolutionary 4E embodied, ecological, cognition—we'll investigate ideas about thinking body, and world

Thinking is something we do through our bodies and our interactions with the world.
