

Cognitive Science Lab

Dr. Art Graesser

Are you interested in...?

- Cognitive Psychology?
- Learning environments with talking heads?
- Human-computer interaction during learning?
- Conversations between people and with computers?
 - Emotions during learning?

Would you like to...

- Develop a *competitive edge* for graduate school applications?
- Gain *experience and hands on training* that will help you in graduate school?
 - Receive *letters of recommendations*?
- Gain valuable *friends and connections* with graduate students and post-docs?

Requirements...

- Must be motivated and hardworking
 - Must be a serious student
- Enthusiastic and have a positive attitude

Responsibilities...

- Involved in the designing of the experiment and obtaining institutional review board approval.
- Assist with gathering the experimental material and with the coordination and collection of data.
 - Help code and analyze data.
- Report results in research meetings and undergraduate conferences.

If you are a motivated and hard working student
who is interested in joining a Cognitive Science research lab,
