

# ABOUT THE CERTIFICATE

The Health Systems Leadership graduate certificate provides students with training in areas critical to 21st century healthcare, public health and community health leadership.

## WHAT YOU WILL LEARN

Competencies:

- Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
- Apply negotiation and mediation skills to address organizational or community challenges.
- Critically evaluate various leadership theories and apply strategic thinking tools to identify a personal leadership style.
- Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
- Know, support and use team development methods.

## CURRICULUM

Students enrolled in the certificate program must complete a total of 12 credit hours:
