

ABOUT THE CERTIFICATE

The Population Health graduate certificate offers focused academic training for public health practitioners and other healthcare leaders who are interested in improving health outcomes in the community.

WHAT YOU WILL LEARN

This certificate program offers foundational public health principles. Students will learn about elements of social and behavioral science, as well as biostatistical methods and epidemiology. They will be able to recognize and evaluate public health information and apply systems thinking to solving public health problems.

CAREER OPPORTUNITIES

This program is designed to enrich opportunities for those already engaged in public health work in a community, research institute, or a clinical setting. The courses can be potentially applied toward a master's degree program in public health in SPH at UofM.
