

# Graduate Certificate in Population Health

## ABOUT THE PROGRAM

The graduate certificate offers foundational principles of public health, including environmental, social and behavioral science, biostatistical methods, and epidemiology. Graduates are equipped to recognize and evaluate public health information and apply systems thinking to solve problems.

## WHAT YOU WILL LEARN

Students will be able to recognize and evaluate public health information and perform data analyses using the most appropriate epidemiological and biostatistics methods.

## CAREER OPPORTUNITIES

Graduates may apply their skills in healthcare settings and public health agencies to improve community health outcomes through data analysis, program development, and policy implementation. The courses can possibly be applied to MPH degree at the University of Memphis School of Public Health.
