

# Public Health Undergraduate Certificate

## AN UNDERGRADUATE OPPORTUNITY TO EXPLORE PUBLIC HEALTH

A distinct feature of the program is its emphasis on experiential and collaborative learning. Students have opportunities to:

- Engage with national and international public health experts
- Explore emerging public and population health issues
- Apply classroom knowledge to real-world challenges
- Build professional networks across disciplines
- Exchange ideas with peers from many backgrounds and communities

## ELIGIBILITY

- Currently enrolled as an undergraduate student at an accredited university in the US or abroad.
- Meet the University of Memphis undergraduate admission criteria.

PUBH 3160 | Public Health In-Action

PUBH 3170 | Health Crises & Milestones in Global Public Health

## PUBLIC HEALTH UNDERGRADUATE CERTIFICATE

15 CREDIT HOURS

## ABOUT THE PROGRAM

Provides students from a range of majors with a strong foundation in public health concepts and practice. Through an interdisciplinary curriculum, students examine the societal, behavioral, and environmental factors that influence health and quality of life while developing practical skills in communication, data analytics, and evidence-based problem-solving, locally and globally.

## MAKE AN IMPACT

Public health is dedicated to improving the health and well-being of communities. Through this certificate, students gain the knowledge and skills to contribute to meaningful change through community-based initiatives, advocacy, research, and policy at the local, national, and global levels.
