

RESEARCH LEADERSHIP PROFESSIONAL DEVELOPMENT SERIES

Please join the Herff College of Engineering, College of Arts and Sciences, College of Education, and Division of Research and Innovation as we launch the 2022-23 Research Leadership Professional Development Series! Our first session will highlight the top challenges leaders will face in 2023 and beyond along with strategies to mitigate these issues.

“RESEARCH LEADERSHIP IN A CHANGING WORLD” WITH JIM FITZHENRY

As a lifelong learner, Jim has held numerous transformational leadership positions in sales, sales management, and product management, as well as executive roles in global R&D, digital transformation, ecosystem management, and external technology innovation sourcing - including M&A – over a 33-year corporate career. The constant driver across these positions has been his strategic ability to discover, create, develop, and implement technologies that create a positive social impact while increasing profitability for customers, suppliers, and the company. He believes that the key to success

in the green economy sits with the innovators across an organization - whether they occupy roles in sales, supply chain, R&D, HR, Digital, or the C-Suite, and Jim has collaboratively reached across silos to create game changing outcomes for over three decades.

As a 15+ year C-suite member, Jim has been energized by colleagues who share this social impact innovation mantra. He relentlessly pursues to move industries forward with profitable strategic offerings that improve the world around us.
