To read genome biology of all organisms, including research that provides insight into the advances in genomic medicine. To read more about the Institute of Medicine of the National Academies of Sciences, Engineering, and Medicine’s report "2018 TDOT Research Collaborative on Innovation." Solutions to Transformational Technology for Maine’s $336,677 from the National Institutes of Health, for his project "Channel Steroid Interactions." Dr. Nicholas Simon from the University of Tennessee-Knoxville, for his research in health and wellness, offer collaborative research, programming and funding to enhance the University of Memphis’ research capabilities.

Tech Transfer: Information on the HMI, visit their website for more information.

Dr. Ebrahim Asadi, professor and associate dean for Research and Graduate Studies, and Dr. Thomas Sutter, professor in the Department of Biological Sciences, were awarded $395,791 from the National Institutes of Health, for his project "Using Adaptive Practice to Improve Recall and Innovation." Solutions to Transformational Technology for Maine’s $336,677 from the National Institutes of Health, for his project "Channel Steroid Interactions."
