The University of Memphis School of Social Work SMART Research, Training, and Treatment Center aims to provide evidence-based interventions for school based mental health programming, increase access for school-based behavioral health programming in underserved areas, provide training on best practices in tele-behavioral health, develop opportunities to research the use of technology in practice services to the states most vulnerable populations.

HOURS OF OPERATION

We are a 100% tele-behavioral health clinic. We provide remote services to children, youth, and their families/caregivers, as well as adults in the Mid-South area and across Tennessee. Our current operation hours are Monday-Friday 9:00am-7:00pm and some Saturday's 10:00am-3:00pm.

The SMART Center also hosts a "warm line" for the community that provides support, psychoeducation, and linkage to community services FREE of charge. The "warm line" is not intended for crisis support, but to assist families with identifying resources in the community. The "warm line" is in service Monday-Friday 9:00am-4:00pm CST.

PODCASTS AND MEDIA

SMART CONNECTIONS

The SMART Connections podcast has many helpful podcast episodes to listen to for a wide range of topics. If you are struggling with parenting tips, anxiety, depression, or just want some resources for different aspects of your life, then we have an episode for you. The SMART Connections podcast is run by the University of Memphis SMART Center Warm Line and MSW staff.

Listen to our podcasts on our website and receive more information at https://www.memphis.edu/smartcenter/ and https://anchor.fm/susan-elswick

The SMART Center also recently completed a video detailing our process and what it means to be a part of the SMART Center. You can check it out on our website, as well. You can also access it through this link:

SMART CENTER SPOTLIGHTS

KEEPING YOU UPDATED

We have officially launched our ICHC MomentUM campaign, and we need YOUR HELP with getting the word out. Here is a little more information about why we are raising funds:

**OUR GOAL with this Campaign:** The Interprofessional Community Health Clinic (ICHC) works to enhance the physical, mental, emotional and behavioral health of the urban core and greater Memphis community by serving as campus and community leaders in interprofessional education, practice and scholarship. Increasing needs within the community necessitate expanding the ICHC to improve access to behavioral health programming. Funding is needed to support the expansion of services and to properly equip the clinic to conduct this important work.

**How You Can Help:** Your support eliminates barriers to our services. Financial assistance to supplement the costs of behavioral health services brings them more within reach of families in need. Reducing the expense of behavioral health assessments and protocol needed in this field also makes vital services more accessible. Your donation will help ensure that no one is turned away based on their inability to pay and will allow the clinic to function optimally with the necessary protocol and equipment.
The tele-suites will allow members of the community greater access to mental health services that they might otherwise be separated or withdrawn from. These tele-suites allow clients to feel secure in knowing their confidentiality is safe, and they will also be secure in the knowledge that they are able to receive the services they want without any social repercussions.

By using tele-suites, the SMART Center will also be able to impact more people. Due to the limitations that surround typical service delivery, this tele-behavioral model of service delivery allows for greater reach and wider spread outreach. Clients are able to receive the mental health services they need and deserve to have access to without many of the traditional struggles that befall people trying to receive these services.

So, what are the benefits of a tele-suite?

- The tele-suites will allow members of the community greater access to mental health services that they might otherwise be separated or withdrawn from.
- These tele-suites allow clients to feel secure in knowing their confidentiality is safe, and they will also be secure in the knowledge that they are able to receive the services they want without any social repercussions.
- By using tele-suites, the SMART Center will also be able to impact more people. Due to the limitations that surround typical service delivery, this tele-behavioral model of service delivery allows for greater reach and wider spread outreach.
- Clients are able to receive the mental health services they need and deserve to have access to without many of the traditional struggles that befall people trying to receive these services.

April is Stress Awareness Month!

April is stress awareness month, so take time this month to really analyze the things in your life that cause you stress. This could be a job, a friendship, or even just normal everyday activities. A great way to spend this stress awareness month is by finding the tricks and remedies that work for you! Whether that be doing yoga and practicing mindfulness, or going for walks and changing up your schedule, find what makes you happy this month and lessen your stress!
South City Digital Inclusion Project:

In partnership with Start Co., Knowledge Quest, Code Crew, Urban Strategies and the Women's Foundation of Greater Memphis, the University of Memphis Center for the Advancement of Youth Development and the Department of City and Regional Planning presents the next face-to-face South City Digital Inclusion Project. This event is described in the flyers and is being hosted by the Memphis-Shelby County Schools South City Resources Center at Booker T. Washington High School on April 12th from 5:00 pm-7:00 pm. This is a family friendly event, the whole family is welcome.

The purpose of the SCDIP is to bridge the digital divide - a problem that has been exacerbated by the impact of the Covid-19 pandemic. Services and resources include:

- Provision of broadband internet
- Provision of "digital connection" training, resources, and mentoring for adults and youth
- Provision of advanced "digital education" training for youth

World Autism Awareness Day!

World Autism Awareness Day is observed on April 2nd every year. The United Nations declared it an international holiday in 2008 to highlight the need to help improve the quality of life of those with autism so they can lead full and meaningful lives as an integral part of society. Autism is a lifelong neurological condition that manifests during early childhood, irrespective of gender, race or socio-economic status. The term Autism Spectrum refers to a range of characteristics. Appropriate support, accommodation and acceptance of this neurological variation allow those on the Spectrum to enjoy equal opportunity, and full and effective participation in society. Autism is mainly characterized by its unique social interactions, non-standard ways of learning, keen interests in specific subjects, inclination to routines, challenges in typical communications and particular ways of processing sensory information. The rate of autism in all regions of the world is high and the lack of understanding has a tremendous impact on the individuals, their families and communities. The stigmatization and discrimination associated with neurological differences remain substantial obstacles to diagnosis and therapies.
