The setting takes place in a big snowy city in and begins in main character Peters bedroom, as he awakens too discover that snow has fallen during the night. He celebrates this day by putting on his red snow suit after breakfast and heading outside for an adventure. When he gets outside he finds snow that is piled high. Peter makes a snowman, snow angels, and pretends to be a mountain climber. As Peter discovers these innovative ways to enjoy the snow he encounters issues and learns how to deal with the changing problems that confront children as they grow up. This book can be used to describe feelings and emotions.

The Lesson Plan

Book: The Snowy Day

Grades: Pre-K–2

Themes: Snow, Creative Play, Feelings, Discovery

Subjects: Language Arts, Visual Arts, Science

Objectives

Students will be able to:

- identify and discuss elements of a story
- discuss and understand new vocabulary words
- participate in activities in a group and individually

Supplies Needed

- bell
- donated material (doll shoes, toothpicks, rubber stamp, cotton swabs)
- blue construction paper
- craft paint and brushes
- art paper
- props for playacting (mitten, gloves, scarf)
- assorted blocks
- math games

Introduction

Each session begins with a reading of the story to the class, followed by basic comprehension questions, such as: What did Peter want to do when he saw the snow? What did Peter use to make a track in the snow? With successive readings, the questions can become more interpretative: How did Peter feel about not being able to play with the big boys? What do you think Peter was thinking about in the bathtub?

Then the children come up with words that describe snow, which the teacher records on a large whiteboard. Once the centers are explained, the students are organized into groups of four and spend 20 minutes at each center. A bell rings to announce clean-up time, and two minutes later, a second bell sends the children to the next center. The centers in this lesson plan are geared to kindergarten, but can also be used in first and second grade by making the tasks more challenging.

1. **Art Center** (adapted from Scholastic’s “Ezra Jack Keats Author Study,” in the section “The Snowy Day Extension Activities”). Using the EJK Foundation home page as a guide, the students paint a white, snowy hill on blue construction paper. I asked parent volunteers to make cutouts of Peter prior to the lesson, and supplied doll shoes, toothpicks, a rubber stamp and cotton swabs for Peter’s footprints, the track he makes with a stick, and snowflakes.

2. **Writing Center.** The students are given a page with the phrase, “Snow is…,” and directed to complete the sentence with a word from the board, for example, “Snow is cold” or “Snow is soft.” The teacher can also write a child’s chosen word on an index card for the child to copy. The children draw a picture that illustrates their sentence with color pencils or crayons. The completed pages can be compiled into a class book titled, “Snow is….” First- and second-graders can write their own sentence and make
3. **Easel Painting Center.** At this free-choice center, children may paint whatever they like. Younger children can dictate a sentence about their painting to the teacher, who attaches it, while older children can write their own. I like to leave this center open-ended. Some children will paint a favorite scene from the story without prompting!

4. **Playhouse Center.** This area has play kitchen appliances and furniture. The children can play-act situations based on the story or improvise a scene of their choice. Mittens, hats and scarves can be added to the center to continue the “Snowy Day” theme.

5. **Blocks Center.** With many types of blocks, along with wooden people and signs, the children can build a snowy city based on the book, or imagine a different one. Cut-up paper can be used to make snow.

6. **Math Game Center.** Teachers can use board games and other math games, or stick to our theme and provide activities related to snow! I have found fun ideas on the website Gather.com, where member Kelly M. has shared a few math activities for The Snowy Day that work well in this center.

**Why We Like It**

The centers format is a creative way to introduce books to children. Each session starts with a reading, so that the children listen to and discuss the story three separate times. (Scholastic's “Ezra Jack Keats Author Study” provides a good discussion guide.) The activities personalize the learning process, and the children tend to participate eagerly and without prompting. Through reading, discussion and activities, the
children develop a keen understanding of the story that they can transfer into other parts of their lives.

This game is fun for the whole family, and you likely have most of the materials to make it already on hand.
Snowman Slam Materials

- White cups
- Black & orange craft foam or construction paper
- White socks or snowballs
- Glue
- Scissors

Method

To make our snowmen I decorated six white cups using black and orange craft foam. To make the snowballs I tightly balled up three white socks. You can also use these awesome snowballs. That's it!

Artificial snow slim

Here’s how to make it!

(Amazon affiliate links)
You will need:

- Liquid Starch
- Elmer’s white school glue (PVA glue for my UK friends)
- Artificial snow for Christmas crafts – This plastic snow is not the same brand that we used, but it looks very similar.
