

*I'm all about life!*

I've always known that I would teach, but I became a mother at a very young age so I didn't finish my education to move forward in my dream. When my children reached elementary school, I was given an opportunity to work in the school system, but that only lasted a year in a half. Now I'm ready to get back to school, so that I can reach my dreams and goals.

After falling ill and accepting an HIV diagnosis, I'm finally learning to live a healthy life. I'm proud of taking control of my condition with eating a healthy diet.
