During the assessment, you will be interviewed about various kinds of mental health symptoms that you might be experiencing. We will also ask you to complete some questionnaires. At the end of the assessment, we will go over the results, including individually-tailored suggestions that map onto the issues that you are seeking help for. We offer treatment for Posttraumatic Stress Disorder relating to intimate partner violence at the Athena Project and if the assessment suggests that our treatment would be a good fit, we will make it available to you. If the assessment suggests that other kinds of services would better meet your needs, we will make suggestions for where you can obtain those services.

All information is kept confidential, within the limits of the law. All the services offered by the Athena Project are free and available to women ages 18 and older. We have worked with over 550 women since we opened and are committed to providing quality mental health services to the community.
