

Adding UofM Mail to Android OS

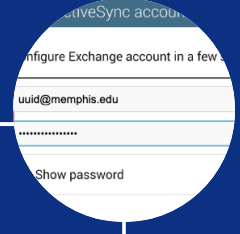

Tap **Settings**

Tap **General**
Tap **Accounts**
Tap **Add Account**

Tap **Microsoft Exchange Active Sync**

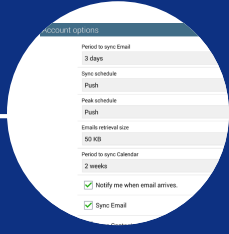

Enter your email address (uuid@memphis.edu) and your email password. Click **OK**.

*Click **Manual Setup**, if setup could not connect to the server.

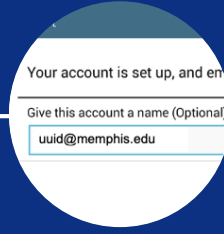

Enter the following information:
1. Domain\Username: username@memphis.edu
2. Password: your University of Memphis password
3. Exchange Server: outlook.office365.com

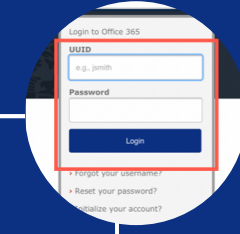

Domain: if available, leave blank

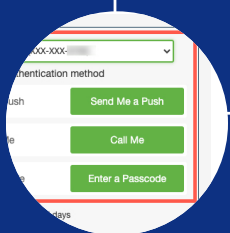

Select your **Account Options**.
Click **Next**.

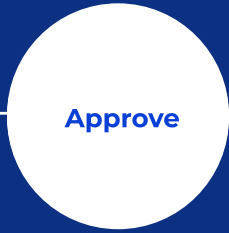

Name your account.
Click **Done**.

Enter your **UUID** and password and click **Login**

Duo authentication prompt will pop up. Select the method of authentication.

A push notification will display. Approve the authentication using Duo.

You've added your email!

***If Asked, enter the following information:**

Email address: username@memphis.edu

Password: your University of Memphis password

Exchange Server: outlook.office365.com

Domain: if available, leave blank

For further more detailed instructions see our documentation.
