5. Click the plus (+) under the printer list to add an additional printer.
6. Select a printer.

A. Select the printer you wish to add from the list.
B. Make sure **Protocol** is set to **AirPrint**. If not, disconnect from the network, reconnect, and try again. If you still cannot see AirPrint, contact [PaperCut Support](#).

C. Click Add.

*Note: If you want to use more than one printer on campus, repeat these steps for each printer.*

7. To print, open the content you want to print.
   A. For a website, select **File** then **Print**.
   B. For a document, select **File** then **Print** or **command** (**⌘**) **P**.

*Note: The last printer you added is your default printer. If you do not wish to use that printer you will need to select the correct one.*

8. Select your desired print settings.
9. Click Print.

10. Finally, authenticate using you’re A) UofM credentials and B) click OK. **Note:** If you would like your system to remember your credentials click the check box beside Remember this password in my keychain.
Things to Remember:

If you enter the wrong authentication details, MacBook devices do not show any warning message; your job will just not print. If your job doesn’t print, check the Print Queue dialog. If the print job is there and has the message Held for authentication, click the retry icon; then re-enter your login details.

If you are using account selection, then additional configuration is required. Contact your system administrator for more information.
