Things to Remember:

If you enter the wrong authentication details, MacBook devices do not show any warning message; your job will just not print. If your job doesn't print, check the Print Queue dialog. If the print job is there and has the message Held for authentication, click the retry icon; then re-enter your login details.

If you are using account selection, then additional configuration is required. Contact your system administrator for more information.

Note: When printing multiple pages, keep your page amount below 50, or the print tab will reset
