Purpose
This training material highlights how to manage, create, and understand the Change Management modules in the TOPdesk ticketing system.

Audience
University of Memphis staff responsible for entering and managing Change Management Modules within TOPdesk.
Getting Started

Logging into the System

1. Browse to the Service Desk ticketing Website, choose Operator Login.

2. Login with your UUID and password. (The UUID and password is the same one you use for myMemphis Portal and all other campus resources.) Click Login. Next, authenticate with DUO.
The opening screen is your personal TOPdesk workspace. 

*Note: This is the default view; the workspace can be customized.*

---

### Add Items to Your Quick Launch Bar

You can add buttons to the Side Launch bar to include links to internal or external web pages. It is also possible to add links to frequent activities.

1. Click on the Edit icon at the bottom left and bottom of the Quick Launch Bar.
2. To add a new Shortcut, A) click Preliminary Request for Change form to create a new shortcut icon and B) click arrow to move to right hand column. C) Click Save.

![Adjust 'Quick Launch' bar](image)

3. The shortcut will be created and displayed as ![image].

Note: Shortcuts created can be edited at any time.

Creating Preliminary Request for Change

Preliminary Request for Change can be created from a variety of locations within TOPdesk. The Quick Launch Bar is one way (and probably the fastest, if you have the shortcut). If you do not have the shortcut, see: Add Items to Your Quick Launch Bar.

Click on the Preliminary Request for Change ![image] icon.
A new tab will then display the relevant Preliminary Request for Change:
Red areas indicate required fields.
New Request for Change: Tabs

Each New Request for Change card contains a series of tabs (any that are bold need to have information entered or updated):

![Tabs Menu]

**General:** Contains the main request information.

**Route:** Displays approval history.

**Links:** This option allows the operator to link additional users to the request. Linked users can then be sent an email as part of the request process.

**Project:** Allows one to place University Strategies and executive priority to the request. These can be chosen from a drop-down menu.

**Attachments:** Gives a document overview of any attachments associated with the change.

Preliminary Request for Change: Toolbar

Key options which you may need to use on an incident/ticket:

![Toolbar]

A. Click to save a request
B. Click to Bookmark a request
C. Click to reload data on a page
D. Create button allows you to create the following

![Create Options]

- Request for Change
- First Line Incident
- Second Line Incident
Create a new Request for Change using the current request as a template.
Create a new First Line Incident or Second Line Incident using the current request as a template.

E. More:

- Print - To print a request
- Add to cart - *This option is not used*
- Archive - Click to archive the current request
- Delete - Click to delete the current request

**Caller Area**

1. **Name:** Simply type the client’s UUID (in this example, ttiger is used to find Tom Tiger).
This is entered as First Name, Last Name—if you begin typing the name TOPdesk will complete. If there are a number of people with similar names you can use the drop down to select the correct person.

TOPdesk will pre-populate location, user name, and telephone number where available. This information is taken from LDAP; if it is incorrect, users should make changes in myMemphis portal.

Note: If the caller does not have an LDAP record, the ticket can be created as an unregistered caller; click the right arrow and select Unregistered caller. In this case you will need to fill in the caller details/contact information manually.

Unregistered callers are not saved in the database, so if the same caller needs to log further tickets the information will need to be re-entered.

Emails coming into TOPdesk from unregistered users will use the ‘name’ associated with their email account.

Details Area

1. Template: Choose from templates in the drop-down menu.

Type: Categorizes requests from the following options within drop-down menu.

- **Emergency Change**: A change that is available for all to see.
- **Linux Patching Production**
- **Linux Patching in Test Banner Production**
- **Server OS Patching**
- **Planned Change Request**: A change that will only be seen in-house to operators within the TOPDesk system.
2. **Brief Description:** Provide a summary of the request.

3. **Category:** Choose the most appropriate category for the affected service. Choose the category from the drop-down menu.

**Sub Category:** Sub category is based on the Category chosen. Choose the most appropriate for the affected service.

**External Number:** An alternative number that is not listed as your contact in LDAP.
Planning

1. **Emergency Change**: This is a change that needs to be implemented immediately and should be selected by the template.

   ![Emergency Change Selection]

2. **Impact**: Choose from the following options: Low, Medium, High.

   ![Impact Selection]

3. **Benefit**: Choose from the following option: Low, Medium, High.

   ![Benefit Selection]
4. **Priority:** This is automatically calculated by the Impact and Urgency options selected. Priority (P1 - P5) in highest to lowest ranging from the drop-down menu. Choose a Priority.

5. **Coordinator:** Select the name of the person overseeing the change request. =

Or click on the three horizontal ••• dots and click **Find** to browse a list.
6. Authorize Preliminary Request for Change

Define who is approving the change request.

![Authorize Preliminary Request for Change](image)

7. **Operator**: Begin typing the name of person who will approve the request.

![Authorize Preliminary Request for Change](image)

Or click on the three horizontal ••• dots and click **Find** to browse a list.

**Note**: If you have allocated a request to yourself but become unavailable, another operator may pick up the request and reassign it to themselves.
8. **Status**: Status of the request, choose from:

![Authorize Preliminary Request for Change]

- Accepted - Indicates the manager has accepted the change request.
- In Progress - Indicates that the change request is in progress.
- Logged - Refers to the hours worked on a change request.
- Pending approval - Indicates that for the change request to continue, someone must approve.
- Pending user - Indicates that for the change request to continue, another person must complete a task.
- Rejected - Sends project back to change request initiator.

9. **Approval Status**: Enter approval status.

![Authorize Request]

10. **Request Area**

![New Request for Change]

Use this area to give a detailed description of the request. You can attach a file in this area using the attachment icon 📃.
11. **Action Area**

Use this area to record the actions you have taken to resolve the Incident. Insert text into your response. You can attach a file in this area using the attachment icon.

**Make Invisible for caller:** This can be used to make notes within the Incident for either yourself or another operator group.

Use the formatting bar located to the right and above the Action area, to A) format text, B) include an attachment, C) include a link, D) create default text or E) enlarge Action area.
Saving the Request

The request can be saved by clicking \( \text{Save} \), the request is then assigned a request number. For example, “C1811-028”: this is made up of “C” indicating this is a Change Request, “18” which shows the year logged, “11” shows the month logged, and “028” which is the request number.

Once the request has been saved, the actions are date and time stamped and displayed with the most recent action appearing just under the New Action area.

TOPdesk will automatically create an email to the appropriate group or manager with details of the information you entered in the Action Area.

The message can be edited and added to before sending if needed. Just below \textbf{To:} you can select CC, BCC or \textbf{Reply to} information. The Attachments tab can be used to attach files, media, etc. to the message.
Attaching Files to an Email

You can attach files to an email by selecting the **Browse** button. This will upload any file on your device and attach it to the email.

*Note: To attach a file to an Email, you must choose to do so as you compose the email.*

When composing an email, TOPdesk presents you with an email window.

1. Click on the **Attachments** tab to see the available attachments (those already uploaded).

2. Select the attachment you wish to use by clicking the check box next to it. When you send the email, the file will be attached to it. Once satisfied with the email, click **Send**. If for any reason you do not wish to send the email, click **Discard**.

*Note: Even if you have checked the **Make Invisible to Caller** box TOPdesk will still attempt to send the caller an email—however, the email will contain the last Action Information that was visible to the caller rather than the invisible comment. You also have the capability to discard.*
Handy Hints:

- **Red Fields**: Indicate mandatory fields.
- **Caller Name**: Enter the person’s UUID in the **Network Login Name** field rather than entering their name.
- **Changing Caller Name**: If you select the incorrect person, click in the name field and retype the correct name.
- **Contact Information**: Caller details should **not** be edited as they will be overwritten by the next import. Instead, alternative contact information should be recorded in the Request Area.
- **Make Invisible to Caller**: Can be used to make notes within the incident and will not be visible to the caller.
- ** Emails**: Can be edited before sending. Actions added using the Make Invisible feature will not be sent. Instead, TOPdesk will send the last visible action.

**Example of Emergency Change Email:**

![Emergency Change Email Example](image)

**Example of Planned Change:**

![Planned Change Example](image)
Finding a Request for Change—Using Caller Card

This method of searching will only work for clients who have LDAP accounts, you will be unable to search for unregistered callers in this way.

1. Click the **Caller Card** icon.

2. Enter either the caller’s UUID or Name in the caller card—this uses LDAP and will auto-populate with other caller details.

3. After locating the correct name, press Enter on the keyboard. A list of requests associated with the caller will be displayed below. Select the check box to see a summary of the information.

4. To open the request for editing, select the A) check box next to the relevant line and click B) the Edit button from the drop-down menu.

   *Note: You can also double-click on the request number to view and edit the request.*

5. Make any changes necessary and click **Save**.
Viewing & Opening Change Management Modules Assigned to You or Your Department

Requests that are assigned to you (or your operator group) will be displayed in your Tasks Overview on your main TOPdesk workspace.

1. The Tasks block displays the number of tasks that must be processed by you or your operator group and the number of requests which are unassigned. The left column displays the tasks assigned specifically to you.

   ![Tasks Overview](image)

   The layout of the Tasks overview can be edited and customized using the Edit button.

   Note: TOPdesk does not automatically refresh your tasks you must click the Refresh Button to see an up-to-date list of your tasks. Do not use the refresh on your browser.

2. To access a list of the requests, click the number shown, the Tasks list is then displayed.
The Task list can be edited, sorted, and the columns adjusted to suit the individual operator. Click the upper edge of the column to sort by column; the arrow displayed will indicate whether the information is sorted in ascending or descending order.

The layout is also controlled by any settings selected in your User Settings. For example, coloring of tasks dependent on due date.

Selecting the check box at the end of a request line will display a request summary at the bottom of the screen.

3. The Task list can also be filtered to make it easier to find a particular item. To filter, select Filter from the drop-down menu.

Use the drop downs and radio buttons to create your filter and click OK.
4. To open and edit the request card, select the associated check box and choose edit button from the drop-down menu, the request card is loaded in a new tab.

5. As with a new request, you can now edit, update, escalate, assign the request to yourself, record time taken, or resolve the request.

6. Remember to save if you have made any changes.

Resolving/Completing a Request

1. When a Request has been finished, you will need to ensure the request is completed.
2. Open the Request and select Completed from the Status drop down. The request will then automatically date and time stamp the end of the request.
3. A) Enter the **Final Action Note** then B) Click **Save** to save changes made.

![Image of Management tab in a software application]

4. An email will then be automatically sent to the appropriate group confirming the request is completed.

**Setting a Start Date and Target date**

Make sure that simple Plan dates are set for Preliminary Request for Change.

1. Go to **Management tab**

![Image of New Request for Change page]
2. Under Simple Change (Plan) choose a **Start Date** and a **Target Date**.

3. Click **Save**.
Add Change Calendar to Your Quick Launch Bar

You can add buttons to the Side Launch bar to include links to internal or external web pages. It is also possible to add links to frequent activities.

4. Click on the Edit icon at the bottom left and bottom of the Quick Launch Bar.

5. To add a new Shortcut, A) click Change Calendar form to create a new shortcut icon and B) click arrow to move to right hand column. C) Click Save.
6. When you click on the Calendar icon in the Side Launch Bar, the calendar view of Preliminary Request for Change Calendar can be seen.
Locating Help Resources

Upon completing the training covered in this course, faculty, staff, and students are able to receive additional training help and resources. Such help can be located as follows:

Service Desk Request

Submitting a Ticket

- Login URL:
  - [Here is a link to our service desk ticketing system](#)
  - [After logging in, choose the link Request Help or Services](#)
  - Choose Request Help or Services.

Call the ITS Service Desk (901.678.8888) any day of the week! (Excluding Some Holidays)

- The ITS Service Desk hours will be as follows:
  - Monday - Friday 8:00 am - 8:00 pm
  - Saturday 10:00 am - 2:00 pm
  - Sunday 1:00 pm - 5:00 pm
- You can contact the Service Desk for assistance with technical login problems or issues. Incoming calls after hours will be handled by voicemail services. If you require assistance after 8:00 pm, please leave a message or submit a service request.
- Messages will be checked regularly and receive priority response the following business day. You may also email The Center for Teaching and Learning, umtech@memphis.edu (using this email will automatically generate a help desk ticket).
