Dropbox submission will remain with the old group. User's grade will be based on the current group's grade. New files must be uploaded to the new group.

eCourseware Group Enrollment Types

The following descriptions provided by D2L explain the enrollment type options available when creating a new category and provide conceptual information on when they should be used.

- **# of Groups - No Auto Enrollments** - Selecting this option creates a specified number of groups, which you can add any number of users to through the Enroll Users page.
- **Groups of #** - Selecting this option creates the minimum number of groups needed to place users in groups of a specified maximum size. More groups are created when they are needed to accommodate users.
- **# of Groups** Selecting this option creates a specified number of groups.
- **Groups of # - Self Enrollment** Selecting this option creates the minimum number of groups needed to accommodate users in groups of a specified maximum size automatically. Users choose the group they want to enroll in from the Groups page.
- **# of Groups - Self Enrollment** Selecting this option creates a specified number of groups, which users enroll in from the Groups page.
- **# of Groups of # - Self Enrollment** Selecting this option creates a specified number of groups with a specified number of enrollments per group. Users choose the group they want to enroll in from the Groups page.
