

## Definition

### Certificate

We have supplied a list of optional graduate certificates that you may find relevant to your M.S. in Sport Commerce degree. A certificate typically takes 12-15 credit hours to complete and will be listed on your transcript upon conclusion of the program. These 12-15 hours will replace your necessary elective hours.

The purpose of a certificate is to help you cultivate career competency in a particular subject in addition to your Master's degree. Each certificate has different requirements. Please refer to the school's graduate catalog for additional information.

### Focus Area

In order to better shape your M.S. in Sport Commerce degree around your specific wants and needs, we have included a list of optional focus areas. This list will help you study, more in depth, a particular area within the Sport Commerce program. Please note that focus areas are not listed on your transcript but could be listed on your resume. Again, these classes will take place of your electives and will not require extra classes to be taken.
